NIOD

PRODUCT MANUAL

PHOTOGRAPHY FLUID, OPACITY 12% 30ML

A novel approach to creating a foundation for skin that reflects even radiance in life and very specifically through the camera lens, this instant treatment is serum-textured but contains a wide array of light refracting prisms, tone and hue correctors and topical photofinishing technologies to offer even radiance within seconds.

DIRECTIONS

Apply instead of or under liquid foundation to balance out undesirable colour tones and skin imperfections.

This formula can also be mixed with other products for subtle hue correction.

LIGHT REFRACTION TECHNOLOGIES

Bio-Silica Photo Finishing Prisms Grades 3, 7, 9

Multiple grades of next-generation ultra-fine particulates refract light in thousands of directions to create an immediately-noticed even tone to the skin.

Nano-Prismatic Blurring Suspension

Ultra-fine super-blurring suspension uses fine prisms to create an systematic confusion of a perfect skin surface with reduced visible lines and pores immediately.

CHROMATIC RADIANCE TECHNOLOGIES

Nano-Prismatic Gold Technology

Disappears immediately upon application with a natural golden hue as a foundation to healthy-looking, radiant skin.

Patented Dragon Fruit Chromatic Refractor

First-ever bio-fruit complex to provide immediate radiance to the skin as tested under multiple light conditions and under camera settings.

CAMERA HUE CORRECTION TECHNOLOGY

Nano-Prismatic Yellow-Red Hue Corrector

Sixth-generation, ultra-fine hue corrector blacks out red tones and minimizes undesirable yellow ones for skin that looks instantly better in life and on camera.

SUPPORT TECHNOLOGIES

Surface Mesh Adherence Technology

Offers a breathing film that disallows perspirationinduced or unintended wash-off of other technology in this product or those applied subsequently to this product.

Oil-Free Hydration Bio-Sugar Complex

Light, instantly-absorbed, oil-free bio-complex is clinically proven to offer comfortable hydration immediately with an effect that lasts 48 hours after each application to allow the corrective technologies in the product to be compatible with even the driest of skin types.
